
THE CHALLENGE

Most associations are caught in a frustrating cycle: systems that don't communicate, staff drowning in manual workarounds, vendors that over-promise, and budgets stretched thin with little to show for it.

Before investing in new systems or major upgrades, you need clarity and confidence. Our Technology Assessment gives you exactly that.

OUR APPROACH

We evaluate your entire technology ecosystem — not just your AMS — across four structured phases:

- ✓ **Interviews with leadership and key staff, process inventory, and a full audit of every system in use** — Discovery
- ✓ **System performance, integrations, data quality, security posture, contract review, and value-for-money assessment** — Technical Evaluation
- ✓ **Peer benchmarking, total cost of ownership modeling, gap analysis, ROI projections, and risk identification** — Strategic Analysis
- ✓ **A prioritized 3-year plan with phased implementation, realistic budgets, and vendor guidance** — Recommendations & Roadmap

WHAT YOU'LL RECEIVE

- ✓ Executive summary prepared for board presentation
- ✓ Current state analysis with detailed findings
- ✓ Gap analysis and risk assessment
- ✓ Prioritized recommendations with rationale and ROI projections
- ✓ 3-year strategic technology roadmap with phased approach
- ✓ Vendor shortlist and evaluation (when applicable)
- ✓ Executive presentation and staff workshop
- ✓ Tools and templates for ongoing use
- ✓ 30-day post-assessment support

WHY ASSOCIATIONS REWIRED

- 30 years of association technology expertise — we know the vendors, the budget realities, and what actually works in this space.

- Vendor-neutral and objective — we're not tied to any platform or reseller. Our only agenda is your best outcome.
- AI-enhanced methodology — we use AI to accelerate time-consuming analysis, so our consultants focus on strategy. You get deeper insights at 30–40% lower cost than traditional consulting.
- Practical deliverables — no 100-page reports that sit on shelves. Actionable roadmaps with clear next steps, realistic budgets, and measurable success criteria.
- Beacon Tech Research integration — our proprietary AMS database informs your decisions with data from thousands of association requirements and implementations.

INVESTMENT & TIMELINE

Small Associations (< \$2M revenue)	\$18,000 – \$24,000 5–6 weeks
Mid-Size Associations (\$2M – \$10M)	\$28,000 – \$38,000 5–6 weeks
Large Associations (\$10M – \$50M)	\$40,000 – \$55,000 6–8 weeks
Enterprise Associations (> \$50M)	\$55,000 – \$75,000+ 8–10 weeks

Complexity add-ons available for multi-AMS environments, extensive custom development, multi-organization structures, or heavily regulated industries.

COMMON OUTCOMES

- ✓ 15–25% potential savings through vendor consolidation and contract optimization
- ✓ 20–40% efficiency gains through automation and integration improvements
- ✓ Hidden risks surfaced: vendor viability, security gaps, data quality issues
- ✓ Quick wins implementable within 90 days for under \$10K
- ✓ Technology priorities aligned with your strategic goals — and defensible to your board

"Before the assessment, we were drowning in disconnected systems and manual workarounds. Associations Rewired showed us exactly where our technology was failing us and gave us a clear roadmap. Within 6 months, we'd cut manual data entry by 60% and saved \$40K annually. The assessment paid for itself in the first year."

— Association Executive Director
